

Smartline X Ultra

Evacuation equipment

- Compact size
- Lightweight
- Big capacity

EN 341 : 2011

Product description

RESQ Smartline X is in its class the smallest and lightest personal evacuation equipment to its high capacity and size. With a maximum load of 140 kg, maximum descent distance of 200 meters and a total weight of 3.8 kg (200 m), Smartline X becomes unique. With weights from 2 to 3,8 kg, it's easy to carry the equipment attached to the harness to ensure availability in an emergency, wherever you are in the elevated workplace. The Aramid rope has an incredible strength to diameter ratio and has heat resistance over 480 C. Smartline X can even be suitable where the sudden fire appears. Material shortages due to the pandemic have resulted in the need for Cresto Group to periodically and temporarily replace certain components on our products with replacement components fulfilling the same function. Due to this, the product images may differ from that which is delivered.
